ADVANCED STONE SEAL PRO

Heavy duty impregnating stone sealer for natural stones

Advanced Seal Pro Glossy

Wet Look

Seals with a
"Wet Look
Finish" Stain
Resistance
Reduces Water
Permeability

Advanced Seal Pro Matte

Natural Look

Seals with a
"Natural Look
Finish" Stain
Resistance
Reduces Water
Permeability

INSTRUCTIONS FOR USE

A Solvent based deep penetrating sealer designed to use on all stone like marble, lime stone, granite, slate and sandstone to reduce water permeability. It is also used on Natural Stone to enhance the colour.

- Ensure the surface is clean and dry before applying the sealer.
- Apply **LA STONA ADVANCED SEAL PRO** to the surface using soft bristle brush or a spray bottle.
- Allow minimum of 2 hours of drying time between two coats. Apply more coats if necessary depending on the porosity of the surface.

COVERAGE

- 35 - 40 sqft for Sandstone
- 55 - 70 sqft for Marble
- 55 - 70 sqft for Slatestone
- 45 - 60 sqft for other stones

NOTE: Approx 35 - 70 sqft per coat per ltr depending on the nature, surface, method and porosity of application.

NATURAL STONE INSTALLATION

Step by step guide

01

Remove all the stones from the boxes and mix it to get the perfect natural look. Mockup laying is recommended.

02

Apply Generous Layer of Mortar across the wall using notched edge of a trowel, creation a combed surface pattern.

03

Complete this step starting from the bottom of the wall & moving upwards. Apply thick layer of mortar onto backside of a stone.

04

Press the stone firmly onto the mortared wall surface. Hold for few seconds, repeat this until section is completed. Use Spacers to ensure level arrangement if required.

05

Apply **LA STONA ADVANCED SEAL PRO** stone sealer 2-3 hours after installation. It protects from stains, enhances colour and easy maintainance.
